

SENTINEL INTELLIGENCE DOSSIER

Blockchain Risk & Financial Surveillance Report

CASE REF: SENT-1777714946674
AUDIT MODE: LIVE SURVEILLANCE
DATA SOURCE: ON-CHAIN MATRIX + ML ENGINE
TIMESTAMP: 2026-05-02T09:42:26.675Z
CONFIDENCE LEVEL: 98.4%

1. EXECUTIVE SUMMARY

This forensic audit identifies behavioral patterns associated with low transactional velocity for target identity 0x7ba3Ed6F5c0611F9463f3dDdcf24439394cfB1D8. LOW RISK — No significant suspicious activity detected. Profile aligns with standard retail usage. LOW RISK — No significant suspicious activity detected. Profile aligns with standard retail usage.

2. RISK & FUND FLOW INTELLIGENCE

- Total Transactions: 0
- Total Volume (ETH): NaN ETH
- Unique Counterparties: 0
- Inbound vs Outbound Ratio: 0.00x

Risk classification is derived from transaction frequency, counterparty diversity, and contract interaction ratio.

3. BEHAVIORAL ANOMALY INDICATORS

No anomalous indicators detected within current observation window.

4. AI ANOMALY SURVEILLANCE (ML ENGINE)

- Anomaly Score: 0.00%
- Classification: LOW

Explanation: Machine learning analysis indicates low deviation from baseline wallet behavior patterns.

5. GRANULAR TRANSACTIONAL AUDIT

Showing top 0 of 0 total transactions

TX HASH	COUNTERPARTY	VALUE (ETH)	TYPE
---------	--------------	-------------	------

6. FLOW & NETWORK EXPOSURE

- Network Exposure Level: LOW
- Principal Counterparties:

7. TIME BEHAVIOR ANALYSIS

- Temporal Anomalies: Standard organic distribution

8. FINAL AML CONCLUSION

No significant AML risk detected. Activity consistent with standard usage patterns.

9. OPERATIONAL RECOMMENDATIONS

- Re-audit frequency: Every 24 hours
- Alert Trigger: Flag any transaction above 5 ETH
- Action: Monitor all new counterparty connections.
